

Reigns Infotech develop a tailor-made integrated Inventory and Warehouse Management Software solution

In Brief:

Industry

- Energy

Situation

- Providing solution for better tracking and visibility

Solution

- Developed a tailor-made integrated Inventory and Warehouse Management Software solution

Achievements

- Improved planning process and on-time delivery
- Increased visibility and flow of information

“Exxon Mobil is the largest of the six oil "supermajors" with daily production of 6.5m boe (barrels of oil equivalent).”

ExxonMobil

Exxon Mobil is a multi-national American corporation and is the largest publicly traded integrated petroleum and natural gas company in the world. It was formed on November 30, 1999, by the merger of Exxon and Mobil.

Situation:

Exxon Mobil, an industry leader in the Energy and Petrochemicals business, awarded the project of delivering a wide range of products to various locations in India to a 3PL service provider. Reigns Infotech provided the IT service and solution for better tracking and visibility for the client. The challenges of the project were

- Maintaining optimum delivery schedules and meeting the set deadlines
- Warehouse and Distribution at various locations
- Meeting compliance for all regulatory requirements for EXIM related documentation
- Updated track and trace of shipments

Solution:

Reigns Infotech's solution was to develop a tailor-made Integrated Inventory And Warehouse Management Software Solution that also provide Track and Trace services throughout the process.

- Web based information system for track and trace of shipment
- Automation of documentation for EXIM process
- Provided location implants for better co-ordination by automated systems

Achievements:

- Improved planning process and on-time delivery
- Reduced transportation and administration cost
- Reduced risk/ exposure towards non-compliance of regulatory requirements
- Increased visibility and flow of information
