

## Reigns Infotech provided WMS and DMS Solution

### In Brief:

### Industry

- Manufacturing  
(Telecom Equipment)

### Situation

- Visibility & Inventory Management Solution for all the products

### Solution

- Web-based information system

### Achievements

- Visibility in the Supply Chain
- On-time delivery

**“Tellabs is a US based multinational company that manufactures the telecom equipment in Denmark and Finland.”**

Tellabs Inc, a leading provider of Global Telephony Equipments provides solutions for wireline and mobile networks. Their solutions include new 3G services and streamlining of mobile networks, "triple play" of broadband voice, data and video services, amongst many others. They often service large transnational contracts.

### Situation:

- Tellabs, a US based Telecommunications Equipment Manufacturer & Service Provider got in to a contract to supply products to Power Grid Corporation
- Power Grid Corporation awarded the contract to a Lead Logistics Provider for managing the entire Supply Chain from Ordering to Distribution along with Inventory Management
- Reigns Infotech provided the visibility & inventory management solution for all the products of Power Grid Corporation & the Lead Logistics Service Provider.

### Solution:

- Preconfigured logistics network in the system for Delivery Optimization
- Tracking capabilities includes item visibility, exception reporting & billing with Reverse Logistics
- Visibility of inventory status across locations

### Achievements:

- Visibility in the Supply Chain to all stake holders across the globe
- Value added services such as labeling, kitting were also mapped in the system
- On-time delivery led to optimization of cost
